Key Knowledge

• The internet is made of computers connected to each other around the world. Words and pictures can be sent from one computer to another. When you use websites and some apps, you are using the internet or online

• Computers have programs called browsers, which are used to access the world wide web (www). The web is one of the most important uses of the internet. There are lots of websites on the internet.

• Personal information tells other people who you are and where to find you. Things like your name, address, school and what you look like. You should not share this kind of information with people you don't know.
