<p><b>Key Knowledge</b></p> <ul style="list-style-type: none"> <li>• Relief printing is a technique that allows a design to be repeated multiple times.</li> <li>• A design is created on a surface - known as a printing plate - which is then rolled or painted with ink and printed onto paper or fabric.</li> <li>• The design on the printing plate can be cut away, or added on top, but it has to be raised. The areas that are raised will pick up the ink, meaning any designs drawn on a flat printing plate won't work.</li> <li>• The print will be a mirror image of what you see on your printing plate, so if there is writing in the design it will need to first be written the wrong way around.</li> <li>• Relief printing is the earliest printing process.</li> </ul>

Art	Carlton Assessment Grid		
	Success Criteria	Pupil Reflection	
I can plan my artwork through exploring the work of another artist	Before <input type="checkbox"/>	After <input type="checkbox"/>	
I can mark make on a Styrofoam tile and prepare my tile for a two-colour print	Before <input type="checkbox"/>	After <input type="checkbox"/>	
I can draw and then transfer an image to Styrofoam	Before <input type="checkbox"/>	After <input type="checkbox"/>	
I can use cutting away to produce a layered image	Before <input type="checkbox"/>	After <input type="checkbox"/>	
I can evaluate the effectiveness of my piece	Before <input type="checkbox"/>	After <input type="checkbox"/>
